Go Digital

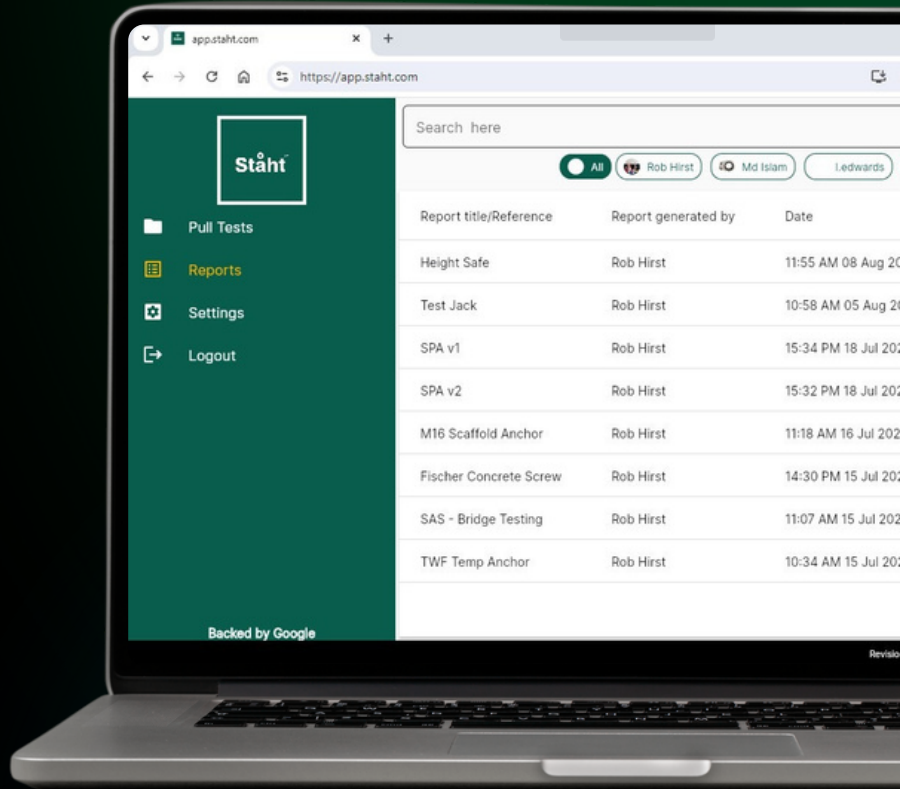

with the Staht Connect digital reporting app,
included as standard.

Superfast reliable bluetooth connection to your device makes recording your test results simple and fast. The Staht Connect app works with various Staht Digital Testing devices for performing a range of construction material tests. It allows users to login, conduct tests, record data in real-time, and generate reports and PDF downloads for detailed information to be shared with team members and customers. The app can record various measurements, including force, displacement, and other relevant data depending on the specific test being performed. All data is stored in the Cloud for easy access and retrieval on your mobile or web dashboard.

Staht Connect's Home view, inspired by Strava, allows you to scroll through a timeline of all your pull tests, with key details like peak load, target load, time, and result status easily accessible. Each test is also pinpointed on the map, giving you a quick visual reference of where it took place. By swiping horizontally, you can dive deeper into each test to view graphs, photos, and more, providing a seamless experience for managing and reviewing your tests.

The Test Details screen in Staht Connect provides a comprehensive view of each pull test, displaying key data like load progression over time, test result, and notes. Additional features include easy access to associated photos, videos, and map data, giving you a complete overview of the test. With everything clearly organized, it's simple to dive into the details and fully assess each pull test.

The Test Folders view in Staht Connect offers a flexible, organized structure for managing pull tests. Customers can organize tests into nested folders, sorted by client, site, or any other category that fits their workflow. With the ability to search through folders and tests, finding the right data is quick and easy. This view provides full control over how your tests are categorized and accessed, allowing you to tailor the system to your needs.

The Test Map screen in Staht Connect displays all your pull tests on a map, making it easy to locate and access tests based on their location. Each test is represented by a marker, allowing you to navigate through your testing sites effortlessly. With a simple click, you can view the details of any test, streamlining the management and monitoring of your testing operations.
